Our Hosted PBX service creates a unified communications environment for the integration of voice, presence, chat, data, applications, and other technologies that help dramatically improve your communication processes and business productivity. Our service allows you to access your account and seamlessly incorporate our high-value cloud communication services.

CLOUD

Your phone system resides in the cloud using your Internet connection with no on premise hardware or software to install or maintain except for phones.

DISASTER RECOVERY

Built-in failover in the event of Internet or power loss.

Calls automatically rerouted to other data centers so customer experience is not affected.

SCALABILITY

Scales to your needs as you grow, using exactly what you need, when you need it.

Phone lines can be added or deleted in a matter of minutes.

UPGRADING FEATURES

All upgrades are made available automatically through the cloud.

COSTS

No hardware costs except the phones themselves.

Pay ONLY for what you need & use.

Multiple locations are supported by one phone system in the cloud.

Most features & upgrades are included in seat cost.

MAINTENANCE

Other than phones, no maintenance required.

MOBILITY

Anyone can connect from multiple devices with an Internet connection, making it easy to extend to a remote workforce.

INSTALLATION

Quick & easy setup and installation.
