We are an FCC-certified provider of SIP Trunking and partners with the leading international, national and regional carriers to deliver wired and wireless last mile connectivity.

We design, implement, manage and support all connectivity services. Our engineering and provisioning groups handle everything including specifying, ordering, circuit testing, installation management, and ongoing account management.

Our Network Operations Center is true 24/7, staffed by skilled technicians. You always reach a live, US-based Technician.

CONNECTIVITY

We are carrier-neutral and will provide the optimum solution and management of the service and the underlying vendor.

- ☑ Direct Internet Access

- ☑ WAVE (DWDM)
- ☑ Fibre Channel
- ☑ Fixed Wireless
- ☑ Dark Fiber
- ☑ SD-WAN

VOICE

We deliver our SIP service from our carrier core network housed in georedundant Tier 1 data centers.

- ☑ SIP Trunking
- ☑ POTS
- ☑ PRI
- ☑ IoT
- ☑ Long Distance
- ☑ Local
- ☑ International
- ☑ Toll Free
- ☑ E911

TELECOM AUDIT & OPTIMIZATION

Our staff of expert telecom services analysts have the experience and tools to analyze invoices and contracts and identify inaccuracies and overcharges by other carriers.

We can identify:

- ☑ Faster incident recognition
- ☑ Faster root cause identification
- ☑ More remote problem resolutions
- ☑ Better information for faster field repairs

Our analysts can evaluate telecom expenditures, provide recommendations and implement actions that will reduce your telecom costs including:

- ☑ Maximizing trunk utilization
- ☑ Least cost routing alternatives among carriers
- ☑ Reducing per-minute charges
- ☑ Compliance to contractual Service Level Agreements
- ☑ Identification of unutilized services
- ☑ Like-for-like transfers
